

# MAT257 Notes

Jad Elkhaleq Ghalayini

April 2019

This document is a collection of notes for the course MAT257: Analysis II, as taught by Professor Edward Bierstone in 2018 at the University of Toronto. The notes are a combination of notes I made in class (which can be found in their original form in the **notes** folder in this repository) and scans of handwritten notes which Professor Bierstone has generously given me the permission to use.

- 1 Introduction**
- 2 Differentiation**
- 3 Integration**
- 4 Manifolds**
- 5 Integration on Manifolds**
