

MAT257 Section 4 Notes

Jad Elkhaleq Ghalayini

April 2019

This document is a collection of notes for section 4 of the course MAT257: Analysis II, as taught by Professor Edward Bierstone in 2018 at the University of Toronto. The notes are a combination of notes I made in class (which can be found in their original form in the **notes** folder in this repository) and scans of handwritten notes which Professor Bierstone has generously given me the permission to use.
